The Board of Trade Meeting

The monthly luncheon and meeting of the Board of Trade was held in the Oliver Cafe on Monday night, and was fairly well attended, although not as well as the efforts of the organization would warrant.

The Board of Trade has been desirous of having the large sign on the highway illuminated. Mr. W. Anderson, commercial manager of the Calgary Power Co. was present, and gave in detail the cost of extending the line to the sign, which was \$310.00. This figure was considered prohibitive.

Thos. Tredaway and J. R. Gilchrist spoke at some length on a scheme they have figured out whereby it would be possible to have the road running by the elevators gravelled. This road has always been in bad condition, and it was pointed out that the Elevator and Oil Companies who have been approached, are willing to contribute a certain amount to have this work done. The Provincial Government has consented to let the Board of Trade have the gravel free of charge at their pit at Beddington and it is expected that the C. P. R. will be willing to bring in the gravel as their share, leaving the money collected for the loading and unloading of the gravel.

The following committee were appointed to take up this matter and report to the executive: R. M. McCool, Thos. Tredaway, J. R. Gilchrist, W. Miller.

The Board of Trade has been trying for the past two years to get the provincial government to build a telephone exchange at Crossfield. The government realized that a new exchange should be built here and that we were well up on the list for such a building, but up to the present no action has been taken.

The Board of Trade is of the opinion that, now, when building materials and labor have been greatly reduced, is the time to build. A resolution was passed urging the government to include this building in their estimates for the coming year.

Mr. Howard Wright, well-known farmer of the Airdrie district, was present, and was introduced by President Fitzpatrick as the winner of the Calgary Board of Trade good farms competition this year, and winner of the standing grains competition last year.

Mr. Wright invited the Crossfield Board of Trade to visit his farm during the coming summer. He pointed out that he was not a believer in the horseless, cowless, pigless, chickenless farm. Mr. Wright concluded his remarks by suggesting a slogan for the Crossfield Board of Trade, which would be simply "let Tom do it." Referring to Tom Tredaway, the man who does the work.

Mr. I. F. Fitch, president of the Calgary Canadian Club, was the speaker of the evening, his topic being the "gold-standard", which was well prepared and presented in a very able manner.

Mr. Collier, principal of the Crossfield school asked for the privilege of inviting the pupils of the higher grades to meetings at which speakers were dealing with subjects that would be helpful to the students.

It was moved and carried unanimously that this privilege be granted Mr. Collier.

Payne Elected at Red Deer

Latest returns from Red Deer indicate that Mr. W. E. Payne, Conservative candidate in the Red Deer bye-election will nose out R. L. Gaez, the U.F.A. candidate by around 100 votes.

Let The Sunshine In

H. R. Fitzpatrick brought to our attention some time ago the very excellent idea of spreading a little sunshine in the Crossfield district. Harry's idea is simply this: There are families in this district who are in need of warm clothing and actually doing without the necessities of life, and Mr. Fitzpatrick is certain that there is enough discarded clothing, etc in the homes of the people of this town and district to help out this situation materially; further he has a storeroom in the lumber warehouse in which he will use to store this clothing and see that it is passed out to needy cases.

With winter all ready set in the need for children's clothing is urgent. All that is necessary to do is bundle up any clothing you care to contribute and leave it at the Atlas Lumber Yard and Harry will do the rest.

Police Court

Leonard T. Stott, "educated vagrant", again appeared before Magistrate George B. McLeod charged with being a "loose idle and disorderly person." The case was once more adjourned, this time until Tuesday morning.

Stott, according to evidence, has a University of Glasgow education. But it didn't do him any good. He came to Canada, worked as a \$10 a week lineman and was fired. Seeing that he was down, out and broke, he married a girl from Carstairs.

"But I won't live with her. She teaches school and I won't have her or her people support me."

The "educated vag" also lays claim to being heir to a vast valuable estate in the old land—Edmonton Journal.

The people of Crossfield will remember this bushy-haired playboy who worked for a time with the C. P. R. engineers on the Crossfield-Cremous branch, and also by the fact that he married a fine girl from Carstairs. We would hate to see him sent down for life.

Curlers Prepare For The Roarin' Game

A general meeting of the Curling Club was held in the Oliver Cafe on Monday evening, Nov. 18. The committee reported on membership drive and advised that sufficient members can be recruited to form a club for the year.

Election of skips resulted as follows: J. L. McRory, Ed. Meyers, Glen Williams, J. P. Winning, C. H. McMillan, Wm. Stralo, Gordon Purvis, J. R. Gilchrist.

The ice committee has engaged L. Overby as caretaker and he has already commenced work.

LIBRARY NOTES

One of the greatest pleasures in life is reading. Every type of book may be had at Women's Institute Library which is now located in Chronicle office. Membership is only 50 cents a year.

ALBERTA DEFICIT \$2,000,000

Premier Brownlee now comes forward with the news that Alberta has a deficit for the year of something like \$2,000,000. That, all things considered, isn't a bad showing, and it is a particularly good showing in comparison with the accounts of Saskatchewan and Manitoba provinces, whose financial position is anything but enviable.

MINARD'S TEA

'Fresh from the gardens'

A Tick At A Time.

Somewhere has told a fanciful story of a salesman who was engaged in an attempt to sell a grandfather clock, telling the prospective purchaser that it would run for one hundred years and be just as good at the end of the period as at the beginning. The clock overhauling this remark began figuring out how many times it would have to tick in that 100 years, and emitted a deep groan, and began to complain "I can't stand it; I can't stand it" whereupon a little cheap alarm clock on an adjoining shelf spoke up: "Cheer up, you don't have to do it all at once. Remember it is just a 'tick at a time, a tick at a time.'"

In these present days as many of us look ahead and see and contemplate the many difficulties to be overcome and the great problems to be solved we are apt to emulate the grandfather clock in its despair and exclaim: "We can't stand it; we can't do it!" Looking at the sum total of the things to be faced and to be done, we become discouraged, forgetting that, after all, we are called upon to do only one thing at a time, and that that one thing is not beyond our ability or strength.

Furthermore, in the doing of that one thing immediately confronting us, we develop the ability and build up the strength which enables us to successfully tackle the next thing, and thus we go on from strength to strength, achievement following achievement, whereas nothing but weakness and failure would result from idle contemplation of the many tasks ahead, leading to discouragement which prevented even a start being made.

It is at the inception of the project to build the Canadian Pacific Railway, financiers and contractors looking from Montreal towards the Pacific Ocean began to count the number of miles of track that were necessary and the millions of ties to be laid, not to mention the streams to be bridged, the tunnels to be bored, and the mountains to be climbed, they too, might well have exclaimed: "We can't do it; it is too much." But they had the sense to realize that in a case of laying down the tie at a time, spiking one rail at a time, and that every tie laid and every rail spiked helped to lay the next tie and spike the next rail. And so the job was done in record time, and the whole history of Canada and the Empire changed for the better.

And so it is with the individual life. Life goes on "a tick at a time." As babies we learn to walk a step at a time, thus preparing for the many millions of steps we will take throughout the years to come. We learn the alphabet a letter at a time in preparation for the multitude of words we later will require to use, and we laboriously recite that "one times one makes two, and two times two makes four," and thus we master the whole world of arithmetic, and in so doing find that nothing is impossible.

And in the philosophy of life it is also well to remember that success and achievement is not confined solely to things material. Too often we regard material reverses and material losses as the "fatal" things of life, forgetting that health, contentment and happiness are the really vital things that matter. And these essential attributes of life are achieved just as material things are gained by, as the little clock said, "a tick at a time."

Grain Samples For Europe

Samples From All Parts Of The West
Sent To European Traders

Samples of this year's western Canada grain crop, in which the prices offered by British and European traders will partly be based, have reached Montreal from Winnipeg and will be shipped immediately to most of the British and continental grain exchanges.

The samples were prepared at the office of the chief grain inspector at Winnipeg and are contained in strong close woven bags.

These samples were shipped by the Board Grain Commissioners and are billed to the grain exchanges and grain trade associations in Germany, Holland, Italy, Belgium, France, England, Ireland and Scotland.

The samples, which are made up annually by the western grain standards committee in Winnipeg, contain grain from practically every district in the prairie west and give a fair indication of the quality of wheat which European consumers might expect in the filling of large orders. Specimens of each grade are included, and before shipment is authorized each sample is analyzed and approved by Dr. F. J. Birchard, chief chemist of the Board of Grain Commissioners' Research Laboratory.

Delayed Publication

Nellie McClung's new book, "Flowers For the Living," was delayed a little in appearance because of a typographical error, which, considering the writer's well-known total abstinence views, looked like someone's idea of a lark. "Between the tall tapers," wrote Mrs. McClung in the first paragraph of the book. "Between the tall tapers," said the version that had to hastily be recalled.

The partridge is the most widely distributed of upland birds in Canada.

Has Served Forty-Five Years

Inspector Cuning of Royal Canadian Mounted Police Retires On Pension
With a record of 45 years service in the Royal Canadian Mounted Police and the R.N.W.M.P., Inspector W. A. Cuning, following a six months' leave of absence, will be retired on a pension at the end of that time, it was learned at the Regina headquarters.

Inspector Cuning tendered his resignation in October. He came from Toronto as a boy and joined the then Royal North West Mounted Police in 1885. He was promoted through the non-commissioned ranks until he has reached his present rank which he has held for a number of years. He has been district paymaster and quartermaster. He was also in charge of the weather bureau at Regina.

Inspector Cuning has the distinction of being the only man in the service for such a long period. Mrs. Cuning is also a pioneer, coming to the west from England 40 years ago. Four sons served in the world wars. Three of them were wounded and one was a prisoner of war for three years.

"THESE HARD TIMES"

"The hard times and scarcity of money makes it more important than ever to economize. One way I save on clothes is by renewing the color of faded or out-of-style dresses, coats, stockings, and underwear. For dyeing, or tinting, I always use Diamond Dyes. They are the most economical ones by far because they never fail to produce results that are as good as new. Why, I could better than new when red with Diamond Dyes. They never spot, fade, or run. They go on smooth and evenly, and in the hands of even a ten year old child. Another thing, Diamond Dyes never take life out of cloth or leave it limp as some dyes do. They deserve to be called 'the world's finest dyes'."

Another Growing Industry

Exports Of Canadian Salmon Have More Than Doubled

Canada is replacing the United States in the British market for canned salmon and for the first nine months of the present season the Dominion more than doubled its exports over the corresponding period a year ago.

Up to the end of September, according to the current issue of the Commercial Intelligence Journal, the United Kingdom imported from Canada 102,000 cwt. of canned salmon, while importations from the United States totalled 96,000 cwt. During the same period last year Canada's share was only 47,000 cwt., while that of the United States was considerably over 100,000 cwt.

Britain imported 262,000 cwt. of canned salmon during 1930.

Asthma No Longer Dreaded. The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that it makes claim for. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

Western Wheat Crop

Yield Of 240,970,800 Bushels Estimated For Season Of 1931

A yield of 240,970,800 bushels in the estimated wheat crop of the three western provinces, according to reports compiled by the Northwest Grain Dealers' Association in its annual forecast.

The acreage on which the estimate is based is that compiled by the association early in the season, taking into consideration threshing returns. The figures for wheat are 18,601,000 net acreage, compared with 23,178,000 acres used in the Dominion Government report, which, on September 9, estimated a crop of 246,000,000 bushels.

Nearly 70 per cent. of Japan farmers cultivate less than two and one-half acres of land per family.

A horse has to be "broke" before it will work. "A lot of people are the same way."

The smaller the mind, the longer it takes to make it up.

CARTER'S LIVER PILLS

AS SHE LOST FAT SHE LOST PAIN

Like many others, this woman found that excess fat did not come alone. In fact she brought sciatitis with it. She did not know that both troubles were due to a common cause—but they found they both gave way before one common remedy.

I have been a martyr to sciatitis and kidney trouble for years. I took Kruschen for about a month, when people began telling me how well I looked. I have lost fat that was no good to me, and now, after three months of Kruschen, I only go 165 lbs. instead of 185 lbs. I'm not going to say my pains have all gone, but I do say I'm wonderfully well, and hope to improve yet. I bless the day I started Kruschen.—Mrs. F. L. P.

The salt in Kruschen assists the internal organs to throw off each day the waste and poisons that encumber the system. Then, little by little, that ugly fat goes—slowly, yes—but surely. The pain of sciatitis and rheumatism cease. You feel wonderfully healthy, youthful, and energetic—more so than ever before in your life!

British Industries Fair 1932

To Be Held In London and Birmingham, England, 22nd February To 5th March

Already the largest national trade exhibition in the world, the British Industries Fair, or the "B.I.F." as it is becoming known in every language, is to be in 1932 still bigger and more representative of British industry than ever before.

This unique display of the manufactures of the home country and of the produce of the Empire countries will open in London and Birmingham on February 22, a date which is chosen because it is convenient for the principal buying season in a majority of the industries represented, and in order to attract the trade buyers from other continents who are in the habit of paying their annual business visit to Europe at that time of year.

In London, the principal development will be a new section filling a large part of the White City, Shepherd's Bush, for the first combined display of the great textile industries of Great Britain and Northern Ireland.

Last February for the first time there was a new section at the White City for the products of the cotton textile industry, while the Artisanal Silk Exhibition became to all intents and purposes part of the Fair by being held during the first week of the Fair at the Royal Albert Hall.

These two exhibitions, the Cotton section organized by the Lancashire cotton trade organizations, and the Artisanal Silk Show were such a success that representatives of these and other textile industries and it was unanimously decided to make a joint display in 1932.

The lighter industries other than textiles, will continue to be housed at Olympia where also the Empire Marketing Board will have its display of the products of the British Dominions and Colonies.

The heavier industries, once again, will have their display in the mammoth permanent Fair Buildings at Castle Bromwich, Birmingham, and there is no less in London, important developments are planned. One of the most important involving still further extensions of the buildings, is a new section for cycles and motor cycles, their component parts, tires and other rubber equipment, and accessories of every kind. This section which will be the first representative display in the Fair of the British cycle and motor cycle industry, is being organized by the Fair Board of Management in Birmingham in co-operation with the British Cycle and Motor Cycle Manufacturers' and Traders' Union who will have an information bureau in the section.

Another new section at Castle Bromwich will be for quarrying and roadmaking plant, and in the organization of this, the Fair will have the co-operation of the Institute of Quarrying which has in recent years organized an exhibition of this kind. In many minor ways the overseas buyers will find the B.I.F. of 1932 more convenient and attractive than in previous years, and it is hoped for the first time to make arrangements for civic and other forms of hospitality which are likely to appeal to the business man from abroad whether from a British or a foreign country. Advances during the winter hours will be by invitation only. Invitations can be obtained from The Office of H. M. Trade Commissioner, 703, Royal Bank Building, Winnipeg.

Restores Spills Of War

Experiments with apex, indicate that these animals see the world in colors, whereas many animals see only shades of gray.

The man who first tried to sell cement for use in building concrete roads was laughed at and called a fool.

Empire Broadcasting Plan

Will Erect Station In England To Broadcast Messages To Whole Empire

Without further delay, the British Broadcasting Corporation will begin plans for the erection of a short-wave broadcasting station at Daventry to which the whole Empire may listen, it was announced recently.

Plans for the station were discussed at the last Imperial Conference but difficulties of financing the project on a permanent basis postponed the development. Now, however, need from an imperial point of view, coupled with a strong desire expressed throughout the Empire, especially from the crown colonies, determined the corporation to proceed without further delay.

The object will be to secure as many listeners as possible throughout the Empire at a convenient time. Details of the time arrangements will depend on experiments. Several wave lengths will be used in order to provide the best reception under varying conditions.

Scheme May Work

British Have Idea To Keep Indian Tribesmen Quiet

Non-violent methods to keep the tribesmen of North-western India quiet are to be used soon by the British. Instead of bombs, an aeroplane is to be filled with a powerful loud-speaker, from which ordinary tones will emerge immensely magnified. The expectation is that the natives will think it is the voice of their god bidding them not to fight the mighty white man, who could not help killing some of them.

Bonus For Large Families

Each of the 10 families in Italy with the largest number of children will be given a five-room bungalow by the governor of Rome, beginning on Christmas, 1932, it was announced recently. Similar prizes will be given each for five years. A proviso that the houses cannot be sold, leased or mortgaged within 30 years will be attached however.

The Tourist's Dollar

How the tourist spends a dollar has been analyzed as follows by the U.S. Department of Commerce: transportation 10 per cent.; garage and filling station 12 per cent.; restaurant, 20 per cent.; hotel or camp, 17 per cent.; retailer, 25 per cent.; theatre and amusements, 10 per cent.; confectionery, 6 per cent.

An Oil That Is Famous.—Though Canada was not the birthplace of Dr. Thomas' Electric Oil, it is the home of that famous compound. From here its good name was spread to Central and South America, the West Indies, Australia and New Zealand. That is far afield enough to attest its excellence, for in all these countries it is on sale and in demand.

Tip To Sheep Raisers

Sheep, like persons, respond to care and good food, so the department of agriculture is reminding sheep owners through a circular letter that such things as salt are needed in a winter diet for sheep.

The electric refrigerating industry is about 15 years old.

Medical Research

Grants Under Banting Foundation Are Announced

Trustees of the Banting Research Foundation announce that the following have been awarded grants for medical research in various Canadian universities:

Dr. A. M. Davidson, University of Manitoba, Winnipeg.

Dr. D. R. Mitchell, University of Toronto.

Prof. D. Mainland, Dalhousie University, Halifax.

Dr. John Mann, University of Toronto.

G. T. Evans, McGill University, Montreal.

Z. R. Lefevre, Queen's University, Kingston, Ont.

There are now under grant from the Banting Research Foundation 14 workers who are scattered throughout Canada from Halifax to Edmonton, including representatives in nearly all the Canadian universities with medical facilities.

The Banting Foundation was established in 1927 following the discovery of insulin by Dr. F. G. Banting, of the University of Toronto.

Male cells never leave salt water, and consequently the female cell only is captured in fresh water streams.

Increase In The World's Wheat Consumption Indicates The Grain Industry Has Promising Future

Strengthening wheat prices and improved demand for that cereal indicate that the international situation is clarifying and the two-year decline in prices is at an end. The economic depths to which wheat sank had the direct result of reducing acreage to the extent of some 14,000,000 acres in Canada, United States, Australia and Argentina, and weather conditions have created a further reduction in production so that it now seems apparent that the world's surplus will be drastically reduced before the end of the crop year.

The world movement of wheat for the present crop year has averaged around 16,250,000 bushels weekly. This demand is running higher by a million and a quarter bushels weekly than the early estimates of Mr. Brownham, well known British wheat authority. The healthy demand is due to low carryovers in importing countries and the comparatively poor quality of the current European crop. Non-European countries have purchased nearly 39,000,000 bushels of wheat so far this crop year, which is 14,000,000 bushels greater than the purchases for the same period last year.

At the present time the attention of millers and traders is centred in the United States' winter wheat area. There is no doubt that the wheat prospect there is not encouraging insofar as large production is concerned. The official estimate of winter wheat seedling will not be available for a month and a half, but private observers predict at least a 16 per cent. reduction in acreage. Last year United States winter wheat area averaged 19 bushels to the acre, on 40,000,000 acres. Winter killing was comparatively trivial because of the ideal condition of the crop as it went into the winter, and the favorable winter weather. The crop this year will go into the winter season under very poor conditions and greater winter killing may be anticipated.

On the whole, the world wheat picture looks a lot brighter at the present time. Dealers show a confidence which has been absent for the past two years and there is always more inclination to buy on a rising market than in the face of falling prices.

In spite of all that has been said about wheat consumption, late figures released by the Dominion Government show that there has been a decided increase in the favorable winter consumption. In the 10-year period from 1921 to 1931, the annual disappearance of wheat has increased by some 700,000,000 bushels. This would tend to the assumption that the wheat industry still has a promising future and that as the years go by the prairies of Western Canada will be called upon more and more to supply the world's daily bread.—Calgary Herald.

Japan Making Progress

People Seem Determined To Be Up-To-Date
Japan is determined to be "in" all the modern movements, and the latest reports from that land of cherry-blossoms show that the young ladies of Nippon have taken up hiking. The Japanese maidens, the Summer School of Oriental Culture at Tokyo, was recently informed, "still venerate Mount Fuji, but they are quite capable of climbing it with knapsacks on their backs." Japanese professional men, too, are determined to be in the swim. When representatives of the world's dentists met at Paris recently, they were astonished at the big strides the Japanese had made in dental science.

Boy Must Learn Languages
Commander Glen Kidston, the English motorist and airman, who was killed in an air crash, has left the bulk of his \$2,000,000 estate to his four-year-old son, Archie, on condition that the boy learn to speak and write French and German.

A man's wife has to hunt his things for him, but a bachelor knows his are on the floor.

"If I stay too late at the pub I feel so exhausted the next morning. Don't you?"

"No, but then I'm married."
—Nagels Lawdie Welt, Berlin.

W. N. U. 1916

New York and London

Competition Over Population Might Have Better Results In Other Fields

We are rather bored with the periodic argument over whether New York or London is actually the largest city in the world. Even though Dr. Joseph A. Hill, Acting Census Director, now declares that the issue has been settled in our favor and produces two sets of figures to prove this point, we are not greatly impressed. It is an honor in which we are uninterested and except for sympathy for London, nothing would please us better than to discover in the next census figures that New York's population had shrunk to half that of the British capital. If there is to be competition between New York and London, there are other fields in which it might be productive of more significant results. On such matters as homicides, motor accidents, noise abatement, park facilities, municipal cleanliness, traffic regulations, public schools and many other municipal phenomena, not excluding official corruption, a little rivalry between New York and London might be a good thing. It is unfortunate that the one aspect of this city in which we seem to take delight in presenting comparisons with London is our size. Perhaps it is a confession of weakness. — New York Evening Post.

Passes Twenty-First Birthday

Safety Glass Discovered By French Chemist In 1910

This year is virtually the 21st birthday of safety-glass, for it was in 1910 that the patent was most generally used was filed. The inventor was Edouard Benedictus, a French chemist of Dutch origin, who had an experimental laboratory in Paris. One day he dropped a bottle to the stone floor, and although it was starred inside like a crystal it did not break. He remembered that it had contained a mixture of various chemicals which had evaporated and coated the interior with a transparent enamel. Benedictus noted the formula, and realized that on his shelf lay the secret of unshattered glass. The patent was filed in 1910, but it was not till Reginald Delpech, the English pioneer motorist, took up the idea that safety-glass was manufactured.

Blind Led the Blind

Each Under the Impression Other One Could See
Mrs. Margaret Wilson, computer operator, blind since birth, stood on a busy intersection waiting for someone to help her across the street.

A man stepped up and asked: "May I go across with you?"

"I'd be glad if you would," replied Mrs. Wilson.

Safely across the street, the man thanked Mrs. Wilson, and she said: "Why, I want to thank you," she said.

"You know," the man continued, "when one has been blind as many years as I have it is a mighty big favor to have some one help him across the street."

New Regulations

Plan For Safety Of Stevedores In Vancouver Harbor Is Presented

A set of new regulations governing the working conditions of those employed loading and unloading vessels in Vancouver harbor, designed to provide greater safety for the stevedores, has been presented for approval of the Minister of Marine, by J. B. Thompson, chairman of the Vancouver harbor commission.

Question of the competency of the Vancouver harbor commission to enact and enforce these regulations is being studied by the Department of Marine, and a decision will be made shortly.

Heavy Heads Hang Low

The same hath happened to the truly wise which befalls ears of corn; they shoot and raise their heads high and pert, whilst empty; but when mature and swelled with grain, begin to sag and droop. So those men who have tried and sounded all things, and discovered nothing solid and firm, have quitted their presumption and acknowledged their natural condition.

Extension and double-tracking of hundreds of miles of government railway lines have been started in Roumania.

Use of chromium-nickel alloys of steel is said to make the steam airplane possible.

Overseas Immigration Offices

Reorganization To Be Expected In The Interests Of Economy And Efficiency

As a move in the interests of administration, economy, and efficiency, the offices of the Department of Immigration and Colonization in the British Isles are to be reorganized so that they will be concentrated in the larger cities only. Hon. W. A. Gordon, Minister of Immigration and Colonization, announced that it was the opinion of the Department that the offices in the British Isles had been greatly overstaffed. The reorganization, he said, might mean that some of the offices would be closed and others enlarged.

No details of the plan were given, but it was understood the changes would be made very shortly, probably before the end of the year.

Activities of the department in British Isles and Europe are under the direction of W. R. Little, and offices are maintained, at present, in London, Liverpool, Glasgow, Inverness, Belfast, Dublin, Bristol and York. It is believed that in the event some of the offices are absorbed the concentration points will be in London, Liverpool, Glasgow and either Belfast or Dublin.

With the general restriction of emigration to Canada from the British Isles and Europe, the overseas offices have been lately concerned with handling the highly selective type of farm settlers and those fulfilling certain requirements for particular localities in this country. Their work has been mainly educative with lectures, lantern slides and motion pictures of Canadian life, motor caravan exhibitions, distribution of literature, and advertising.

No Treasure Discovered

Trunks Of Eccentric Woman Contained Soap From Many Hotels

The search for treasure in the sixty-five trunks stored by Mrs. Ida Wood, 93-year-old eccentric in the Manhattan Storage Co., Seventh Avenue and 52nd Street, New York, resulted in the discovery of no diamonds, bank notes, nor bonds, but it had produced cakes of soap bearing the names of hotels the world over.

Six trunks had been opened. They contained linen, towels, blankets and soap. The Ocean House at Newport, the Hotel Leland at Narragansett Pier, the Windsor at Jacksonville, the Clinton in Philadelphia and other hotels in Europe and the United States—some of which long have been razed—were represented. Some of the towels also bore hotel names.

Otis F. Wood, Mrs. Wood's nephew, recently appointed as guardian, directed the opening of the trunks. He said that inasmuch as Mrs. Wood had not kept house since 1876 most of the things so far found had been in the trunks for more than half a century.

The trunks themselves traced the history of trunk manufacture. Some of them dated from before the Civil War, and were little more than canvas covered crates. Others were heavy iron chests with complicated locks.

An Engineering Feat

Wonderful feat at Parma, Italy, of railway engineering has been performed in the laying of a 240 foot iron bridge on the line between Parma and Spezia, in 12 minutes. The bridge, which weighed 350 tons, was placed in position in the interval between the passage of two trains and traffic was not interfered with.

"Man has excelled the birds" boasts an aeroplane ad. No bird, for example, can keep the ground at 60 m. p. h.

The United States can now call the Canary Islands on the telephone.

More people have autops than bath-tubs—according to the latest statistical figures—but where can you get in a bathtub?

Says Canada Stands On Threshold Of Another Era Of Expansion Such As Has Never Been Known

Canadian Wheat Wanted

Dr. W. W. Swanson Predicts Keen Demand In Near Future

"The billions of bushels of nutritious wheat supplies have faded away," Dr. W. W. Swanson, professor of economics at the University of Saskatchewan and advisor on wheat marketing problems to Premier R. B. Bennett at the last imperial conference, told an interviewer at Saskatoon.

Dr. Swanson reiterated the statement he made several months ago that the so-called surplus was not due to a wheat acreage too large for the world needs but mainly to the abnormal world crop of 1928. He regretted the small western crop this year as he predicts a keen demand, particularly for the higher grades of Canadian wheat to build up the low quality wheat of Europe.

Dr. Swanson looks for rapid disposal of the holdings of the U.S. farm board and regards neither Russia nor the Argentine Republic "as the formidable competitors that many have supposed."

Danger In Stored Fodder

Feed Should Be Thoroughly Dried Before Storing In Barn

Issuing a warning to farmers of the danger of storing green feed and Russian thistle in hay lots since this gives rise to spontaneous combustion, Hon. J. F. Bryant, K.C., warns Saskatchewan farmers that every care be taken in the storing of such feed.

He said he had received a letter from an adjuster of one of the large mutual insurance companies advising him of a case in the southwestern part of the province where a farmer had put up large quantities of green feed and several loads of Russian thistle on September 12, and on September 30 the barn was burned as a result of spontaneous combustion.

Farmers having this type of feed to store would be well advised to store it outside until it is thoroughly dried before storing it in the hay mow.

Wrong Diet Ruins Teeth

Food More Important Than Tooth Brush Says Dental Scientist

It's the conviction of Dr. Perry R. Howe, president of dental science at Harvard University, that the diet is mightier than the toothbrush in keeping teeth sound.

The professor was awarded the Fauchard medal for his researches into the influence of diets on teeth at the convention of the American Dental Association here.

"Brushing teeth is to remove bacteria deposits," he said. "We've been brushing our teeth for 50 years and we still have cavities. Toothbrushes aren't the answer. Diet is."

He recommended more vegetables, fruits and milk in the average diet along with less meats and cereals.

Closed Season For Beaver

Saskatchewan Takes Action To Preserve Beaver For Two Years

Closed season for beaver in Saskatchewan for the two years, 1932 and 1933, is the subject of a recent proclamation.

The Lieutenant-Governor-in-Council has the power, through proclamation, to fix a close season for hunting and trapping a specified animal. The document reads: "No person shall hunt, trap, shoot at, wound or kill beaver in the Province of Saskatchewan for a period of two years, beginning the first day of January, 1932."

Canada can lead the world into the era of expansion and prosperity which awaits it if Canadians will realize their duties and face them with confidence and optimism. Hon. H. H. Stevens, Minister of Trade and Commerce, told a gathering of business men at Brantford.

Endowed with tremendous resources, favorably situated among other nations, Canadians have every reason for believing that an upturn has been reached in their own and world conditions, he said. But they must realize that they share part of the responsibilities of a democratic institution resting upon their own, and not the government's shoulders, and keep to the middle course, which will mean a continuance of the freedom they have now.

With rising commodity prices, more favorable trade balances than have obtained for years, Canada stands on the threshold of "another Victorian era, another era of expansion such as the world has never known, an era in which two-thirds of humanity will learn to know and want the advantages which it has never felt before," he declared. And Canada, he added, is in the position of being in the vanguard of the nations which will benefit most, not tag behind weakly.

Shipping Cattle To China

Canada Has Received Order For One Hundred Head

Preparations are practically completed for an experimental shipment of Canadian dairy cattle to China, David Hunter, of Grimby Beach, Ont., field man of the Canadian Yorkshire Breeders' Association, stated at Montreal.

Canada had received an order for 100 head of cattle for the Dairy Farm, Ice and Cold Storage Company of Hong Kong and the order was being filled with Ontario and Quebec Holsteins and Ayrshires. Mr. Hunter said: "Some 14 Ayrshire cattle left Hamilton, Quebec, November 15, and the Ontario quota of Holsteins left Dundas a few days later, he said."

The cattle were going to Hong Kong for breeding and dairy purposes, Mr. Hunter said. If the shipment was successful, it was hoped it would be instrumental in opening up the Japanese market also.

Bees Keep To Right

Exhibit Is Museum At Washington Proves This Fact

A bee hive with its own cooling system and traffic laws is on exhibition under glass at the National Museum at Washington. A live made of glass is connected with the outside world by a glass passageway. The worker bees travel through it in collecting nectar from flowers outside. They keep to the right in the passageway, crawling speedily in the proper lanes. If the interior of the hive becomes too warm, say museum authorities, the bees will flap their wings rapidly to cool the air.

The Enterprising Australian
Australian enterprise is undaunted by little difficulties such as moving a house. A Western Australian settler got sick and as he lived a mile and a half from his nearest friend, the latter thought he could be looked after better if he were nearer. But the settler refused to leave his house, so the friend made a "bee" and jacking up the house, they put it on a trap and moved it all to the friend's house.

Additional Census Bulletin
An additional census bulletin, covering several cities and towns in western Canada, has been issued. Population of Prince Albert is given as 9,886, as compared with 7,558 in 1921. The Pas, Manitoba, has had a gain of 2,157 to a total population of 4,015, an increase of 116.09 per cent.

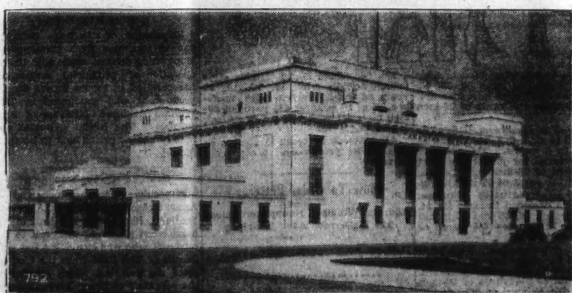

Six forges were kept busy all day during the annual horseshoe making contest at Banff, Scotland, recently.

"Mother, rather is coming home drunk again." — Sandagmiss-Siriz, Stockholm

"If I stay too late at the pub I feel so exhausted the next morning. Don't you?"

"No, but then I'm married."
—Nagels Lawdie Welt, Berlin.

A comprehensive view of the Canadian Pacific's new Park Avenue Station, located at the head of the thoroughfare of the same name, to serve the northern residential districts. This splendid building, completed at a cost of \$750,000, is constructed of limestone and is in combined modern and classical style. Park Avenue was opened for service November 1, 1931.

andle."—The Humorist, London, England.

WORLD HAPPENINGS BRIEFLY TOLD

Pupils in Ontario may now pass through elementary and secondary schools on teachers' recommendation.

Seven hundred and fifty-nine poor Jewish children in Montreal received complete new winter outfits of clothing from a Young Hebrew society.

Vancouver has asked Premier Bennett to hold the proposed economic conference next summer in that city.

November 11, Armistice Day for other allied nations was celebrated in Italy as King Victor Emanuel's 62nd birthday.

France has signed an agreement to purchase 10 per cent. of her requirements of grain from Yugoslavia. The grain to be purchased in Yugoslavia amounts to 15,000 carloads.

Godfrey C. Dean, auto-gyro pilot, performed the daring feat of flying under the centre span of the Montreal Harbor bridge. Two weeks earlier he looped the loop in his autogyro.

When a gust of wind caught the navy blimp K-1, the world's largest non-rigid dirigible was completely wrecked as it was being hoisted in its hangar at Cape May, New Jersey.

Mexico may abandon her navy under an efficiency programme soon to be put into effect by the secretary of war. The present navy consists of a half dozen cruisers and some ancient gunboats.

Alberta liquor sales for the last fiscal year totalled \$4,678,109 compared with \$6,283,507 in the preceding fiscal year. The year's net profit was \$1,758,904 compared with \$2,410,886 in the preceding year.

Using a new form of railway ticket which entitled them, at a cost of \$2.50, to unlimited travel in North Wales, two travellers covered 1,100 miles, making the rate four and four-tenths miles for a cent.

An Earthquake Day

Italy Has More Than Its Share Of Shocks

Earthquakes shiver up and down the Apennine razor backbones of Italy at the rate of more than one a day, or an average of 433 a year. Professor Palazzo, head of the weather bureau in Rome, who receives and classifies the "quake reports, has come to the conclusion that earth-shocks prefer some months of the year and some hours of the day. July is the favorite month; then come August, September and January. Earthquakes choose to wreak their havoc at night rather than in the day. The favorite hours are between midnight and 4 o'clock in the morning.

More than 10,000 dwellings have been built in Amsterdam, Holland, since January 1.

When people are asked to take a bath they usually take to flight.

"Do you never bathe?"
"I can't—a moth has eaten my coat."
—El Traveso, Rome.

Western Fair Dates

Canadian and British Talent May Be Expected To Supply Attractions
Western Canada Fair Association members, at a meeting in Saskatoon, decided that, as far as possible, Canadian or British artists would be engaged to supply attractions at summer fairs through western Canada in 1932.

While no decision as to attractions was arrived at, it is understood that several offers have been received from British bands and British vaudeville artists seeking engagements for next year. All managers and delegates attending the meeting expressed their desire that only Canadian or British Empire artists should appear on the program next summer.

A considerable part of the time of the meeting was taken up with the discussion of ways and means for adopting economies which would not impair the efficiency of the fairs.

Dates of summer fairs for next year were set: Brandon was allotted the week opening July 4; Calgary, July 11; Edmonton, July 18; Saskatoon, July 25; and Regina, August 1. Dates set for 1933 were: Brandon, opening July 3; Calgary, July 10; Edmonton, July 17; Saskatoon, July 24; and Regina, July 31.

Winter fair dates agreed on were: Brandon, starting March 14; Regina, March 21; Saskatoon and Calgary, March 28; and Edmonton, April 4.

Recommends Central Bank For Empire

Would Act As Clearing House For All Banks

A joint committee appointed by the Federation of British Industries and the Empire Economic Union, to examine the financial and currency policy of the empire, recommended the creation of a central bank to act as a clearing house for all banks of the British Empire.

The report further suggests summing up of an empire currency conference which might be able to establish a "pax-Britannica" built up out of the present anarchy of the world's monetary affairs.

The moose is the largest of the American animals.

Says Cancellation Of Taxes Impossible

Premier Anderson Warns Saskatchewan Residents That Municipal Taxes Cannot Be Wiped Out

"There is no manner whereby taxes can be wiped out or dispensed with," declared Hon. J. T. M. Anderson, Premier of Saskatchewan, in a recent statement in which he warned against the assumption, in some sections of the province, that taxes due rural municipalities would be cancelled. Inability of the municipalities to collect taxes, he said, could only result in the discontinuance or curtailment of essential municipal services, while continuance under government control would virtually mean abolition of local self-government without any release from taxation. The full text of the statement, which is a significant and important one in the present juncture, follows:

"The Government has received many letters having to do with the payment of taxes. Some of our correspondents suggest that there is a feeling abroad in some rural districts that a large percentage of the taxes due to rural municipalities by the ratepayers will be cancelled or wiped out in some manner. It is pointed out that this feeling is having a very bad effect on tax collections.

"A little consideration will show that such a course of action is impossible. There is no manner whereby taxes can be wiped out or dispensed with. The taxes paid by our people to their municipalities are spent on five main items:

1. To assist in maintaining schools.
2. To assist in operating our sanatoria.
3. To pay for municipal telephone debentures.
4. To pay interest and principal of our indebtedness owing by municipalities.
5. To pay for municipal hall insurance where same exists.

"Taxes are levied to maintain these services because the ratepayers of each municipality voted in favor of having these services. It is agreed that a considerable number of our rural municipalities are incumbered with debt on account of their expenditures for relief purposes, but it must be remembered that these relief expenditures were exceptional as the times are exceptional.

"If municipalities cannot collect their own taxes because of a disinclination of its residents to pay them, then these services which their own ratepayers voted in favor of having cannot be carried on. It has been suggested that they would still be carried on by the Government taking over the administration of same. If this were done, it would mean the abolition of local self-government and would not decrease the taxes of the ratepayers in these rural areas one iota. Money would have to be found to maintain such services, whether found by the rural municipal councils or by the Provincial Government. These monies could come from one source and from one source only, and that is from the pockets of the people and from no other place.

"We are living in serious times. Municipalities find that although their revenues are decreasing their obligations remain the same and, in some instances, have increased. It is too late at the present time to repudiate their obligations by saying that we shall not pay taxes to assist in meeting them. It is too late to say that while we need these services some one else has to pay for them, particularly when we ourselves have voted for these services. If these difficult times have one lesson for us it is that services are not free. They must be paid for. We are now confronted with the unpleasant duty of paying for these services which we must pay for by means of our taxes. There is no other way.

"What is true of taxes is true of other legitimate accounts. When it is within the power of the debtor to make reasonable payments, then reasonable payments should be made."

Getting More Orders

Shipments of British Columbia canned tomatoes from Kamloops to Hong Kong dealers, made with the co-operation of provincial authorities, has resulted in repeat orders for the product. It was announced by Hon. William Aikman, Minister of Agriculture. The initial shipment sold readily and at prices held to be satisfactory.

Gasoline Always Dangerous

A peculiar accident occurred to Annie Fraser, a servant in Aberdeen, Scotland. She had a hot iron in her hand when she went to speak to her mistress, who was cleaning a hat with gasoline. The heat from the iron ignited the gasoline, which set fire to the servant's clothing, severely burning her.

Weighing only four ounces, a ladder of aluminum is being shown in London, England.

SUNDAY SCHOOL LESSON

NOVEMBER 22
PAUL IN ROME

Golden Text: "I can do all things in Him that strengtheneth me."
—Philippians 4.13
Lesson: Acts 25:1-12; 28:16-31.
Devotional Reading: Isaiah 23-4.

Explanations and Comments

Rome At Last, verse 16.—While still in Ephesus Paul declared that after he had been to Jerusalem he must see Rome. Little did he realize that more than three years, packed with surprising happenings, would elapse before he reached Rome in chains. He "must see Rome." Just as the cohorts and representatives of the Roman government and the merchants of Roman trade went out to all the world along the far-extending network of Roman roads, so Paul expected the message of Christ and His triumphant reign to go out over those same roads to the last corner of the Roman world.

Rome was the great climax of Paul's work, and of Luke's history. In his eagerness which he shared with the apostle in achieving their long-desired goal, the two men, in his record a sort of double arrival. In verse fourteen he says, "So we came to Rome." And again, verse sixteen he adds, "And when we entered into Rome." Paul was shown much kindness by the Roman guards. Possibly the good report of Festus and Agrippa concerning the prisoner they had taken, and without doubt Julius, the centurion whom Paul had helped on the voyage, interceded for him. Instead of being kept in the guardhouse of the Praetorian camp Paul was allowed to hire a house, or lodging, and live there by himself with the soldier who guarded him, and to whom he was chained. He often alludes to these chains in his letters, as he does to the prominent Jews of Rome who came to visit him, verse 29. See 2 Timothy 1:16; Colossians 4:3; Philimon 10; Ephesians 6:20.

There was a frequent change of soldiers, and thus Paul had an opportunity of spreading his message widely among the Praetorian guard. Philippians 1:13, Paul says that he had enabled him to preach Christ throughout the whole Praetorian guard.

The chain on Paul's wrist was his chance to have a listener to his message, and he could write to the Philippians. "I would have you to know that the things which have happened to me have fallen out rather upon the progress of the gospel." Handcuffs can be counted just handcuffs, or capital on which to do the business in hand. It is a great tool to make one's handcuffs one's tools, the very instruments of one's success. Every one knows how Bandy was carried Bedford Jail into Pilgrim's Progress.

Holding Semi-Annual Live Stock Survey

Dominion Bureau of Statistics Announces Change in System

A new livestock survey is to be undertaken by the Dominion Government, particularly of breeding and marketing intentions, on December 1 of this year. It has been announced by the Dominion Bureau of Statistics. Since 1917, an annual survey has been made in June, in co-operation with the provincial governments, and in future years it is intended to continue a dual survey held at June and December 1, and thus secure a perspective of the livestock industry every six months.

In every province, except British Columbia, cards will be distributed to farmers through the rural schools. In British Columbia, the cards will be mailed direct to farmers for their attention. In certain areas of Alberta and Saskatchewan where rural schools are not organized, the livestock associations have co-operated in providing mailing lists so that the ranchers may be reached directly. The cards will be distributed during the latter half of November.

Brazil expects to adopt an eight-hour day and 49-hour week.

Flax meal makes an excellent food for cattle, swine and poultry.

Saskatchewan Salt Well

Said To Be The Deepest Salt Well In the World

Recent developments at the Simpson Oil Company Well, 96 miles northwest of Regina, and about two miles west of Simpson, have resulted in giving to Saskatchewan the deepest salt well in the world, 3,445 feet deep, with a brine that comes out of it 98 per cent. pure, and producing a salt with a saturation of 23 per cent. A small demonstration plant installed at the well has produced some excellent salt.

In 1926 a company was organized at Simpson for the purpose of drilling for oil or gas in the Simpson field. Drilling started that year, and in 1931 the well had reached a depth of 3,445 feet when a flow of brine was struck.

Officials of the company have examined the possibilities for the sale of salt in Saskatchewan, and report that Regina alone consumes six tons per day. In the province of approximately 70,000 are used every year.

With the production of salt in this well, there opens another possibility, the development of the fish canning industry in the northern hinterland, where no attempt has been made to operate because of the high cost of salt. Salt is also used in smelters, and with the opening of the large mine at Regina in the north, directors of the company expect the hope that smelters will be erected to refine the metals where they are mined.

The company plans to erect a modern salt refining plant at the well, and next spring to start another oil well two miles east of the site of the oil well, where geologists say the top of the structure is located. In the meantime salt will be produced for commercial purposes.

Recipes For This Week

(By Betty Barclay)

SAUSAGE WITH GLAZED APPLIES

Shape sausage meat into flat cakes. Dip them in flour mixed with a teaspoonful of sugar and pan broil slowly. Meanwhile cook unpared apple rings in a syrup made by cooking together for five minutes, 1 cupful of sugar, 1 cupful of water, 1 teaspoonful of butter. When the rings are tender place them on a hot platter with a sausage cake on each.

ORANGE BREAD

(Yeast Bread)

(Makes 1 loaf)

- 1 yeast cake.
- 1 tablespoon sugar.
- 1 cup orange juice.
- 1 teaspoon salt.
- 1 tablespoon butter.
- 1/2 cup sugar.
- 3/4 cups flour.
- 1 teaspoon grated orange rind.
- 1/2 cup finely cut candied orange peel.

Let yeast cake and 1 tablespoon of sugar stand a few minutes. Heat orange juice to lukewarm, add salt, butter, sugar, grated rind and yeast cake. Add 3 cups of flour and beat well. Let rise till doubled in bulk. Put 1/4 cup flour on board and knead this in with the candied orange peel. Shape into a loaf. Let rise till light. Bake in a moderate oven (375 degrees Fahrenheit) from 30 to 40 minutes.

Might Start Champion

The staying-in-bed champion of the world has been discovered at Rovigo, Italy. He is Medoro Marassi, aged seventy, and he has remained comfortably between the sheets continuously for 10 years. Mr. Marassi is not ill. In fact, he enjoys exceptionally good health. He just likes to rest.

NEW DOMESTIC LOAN WILL BE LAUNCHED SOON

Ottawa, Ont.—The Dominion of Canada shortly will make an offering of bonds to the Canadian public, probably on November 25, according to the Prime Minister before he left Ottawa for a holiday in Europe.

"The name of the loan will be 'Dominion of Canada National Service Loan,' a statement issued by the Department of Finance declared.

"The campaign is now being organized by a general management committee, of which Sir Charles Gordon, G.B.E., president of the Bank of Montreal, is chairman, and it will be nationwide, the Department of Finance today placing large orders with the king's printer for prospectus and application forms, the initial requisition for the former being for 1,500,000 copies.

"The treasury is closely watching the movements of security prices for, while this issue is to be a domestic one, the day-to-day values of bonds in Canada are influenced by the values placed on Dominion of Canada securities in New York.

This is the first announcement of the impending loan from official sources, although it has been forecast for some time. It has been rumored that the loan would be for \$125,000,000 bearing interest at 5 per cent, but indications are that the exact amount to be asked for had not yet been definitely decided upon and \$150,000,000 may be nearer the mark.

Ask Rate Revision

Application To Imperial Shipping Committee For Lower Marine Rates To Churchill

Ottawa, Ont.—Hon. R. J. Manion, Minister of Railways, has announced that the Canadian Government has made formal application to the Imperial Shipping Committee for a revision of marine insurance rates on the Hudson Bay route.

This committee announced the length of season and the rates last spring. The season was about six weeks in length and the rates considered high.

Since then a test movement of two shiploads of wheat has been carried out. Both ships made the trip to Churchill without delay or difficulty and complete data on their voyages are in the hands of the Imperial Shipping Committee. Upon the strength of this test movement a downward revision of insurance rates is being sought. The committee will have months to work on this reference before the 1932 season opens.

Christian Japs Urge Peace

Leaders Of Christian Movement In Japan Would See Peaceful Means To End Trouble

Toronto, Ont.—Leaders of the Christian movement in Japan have been in touch with the Japanese foreign office at Tokyo, in an effort to forestall further troubles with China in Manchuria, according to information received at the foreign mission offices of the United Church of Canada. This was conveyed in a bulletin from the National Christian Council of Japan.

Executive committee of the National Christian Council of Japan appointed Dr. Y. Chiba and Hon. D. Tagawa to confer with the Minister of Foreign Affairs and "urge in behalf of the Christian council, that only peaceful means be utilized and that a just solution be made the goal in the negotiations between the two nations."

Reds Cause Unrest

Trouble In India Fomented By Communists, Says Sir Arthur Currie

Toronto, Ont.—General Sir Arthur Currie, principal of McGill University, told members of the Empire Club here he was firmly of the opinion that Communism is responsible for much of the trouble in India.

"The world of Communism prefers unrest in India," he said, "and that world is our enemy, spiritually and materially."

Sir Arthur who visited India last year, said "India is seething with political unrest, concerning which considerable unanimity of opinion prevails among the Indian population—a unanimity that is strengthened by family ties and family attachments."

Wallpaper made entirely of glass is the latest product of a glass factory at Lauscha, Germany. The new product is durable, washable, and guaranteed not to fade.

W. N. U. 1914

Economic Conference

Ottawa, Ont.—Announcement by Prime Minister Ramsay MacDonald of the acceptance of the invitation of Rt. Hon. R. B. Bennett for the assembling of the postponed Imperial Economic Conference was heartily welcomed in the capital.

While no official statement was made, it is understood that the governments of other parts of the empire are likewise sympathetic to the proposal of Premier Bennett.

About the middle of July or perhaps a week later is viewed as the probable date of assembling of the first conference of its nature to meet in the Canadian capital to discuss matters appertaining to the advancement of intra-empire trade. By that time, it is fully expected, New Zealand will have held its general conference and all parts of the Empire will be in a position to be represented through ministers of the crown, an obstacle in the case of New Zealand and Australia which caused the postponement, by mutual agreement of the Dominions, of the conference which had been called to meet in Ottawa on August 12 last. The Canadian Parliament, expected to convene in the latter part of January, will probably prorogue in ample time to afford the completion of arrangements for the conference here.

The date of the visit to Canada of Rt. Hon. J. H. Thomas, Secretary of State for Dominion Affairs, to discuss intra-empire trade matters preliminary to the Ottawa assembly, is not definitely known. Mr. Thomas is to visit other Dominions to continue his discussion. With Mr. Bennett leaving for a holiday, it is possible that Mr. Thomas may not come to Canada until the latter part of December or early next year.

British Parliament Opened

Facing Scene Of Splendor King Reads Speech From Throne

London, Eng.—In the great Chamber of the House of Lords, glowing with scarlet, gold and precious stones, the King officially opened Parliament on November 10.

The day began with showers of rain, but along the whole route from Buckingham Palace to Westminster great crowds lined the route, cheering as His Majesty passed by. And, as the King, accompanied by the Queen, entered the Chamber of the House of Lords they faced a scene of splendor. Uniformed ambassadors were grouped on the right and the centre of the floor was so packed with peers that two former viceroys of India, Lord Irwin and Lord Reading, only with difficulty found seats. Along either side of the chamber the wives of the peers sat wearing royal costumes in diamonds and other costly jewels.

There was a brief pause while the Gentleman of the Black Rod summoned the faithful members of the House of Commons to the Bar of the House of Lords. Then, in a clear voice, His Majesty read the Speech from the Throne. It contained a reference to receipt from the Canadian Government of an invitation to an Imperial Economic Conference at Ottawa, an invitation "which has been welcomed by my ministers and will be considered in a most sympathetic spirit and with earnest desire to conclude some mutually advantageous arrangement with the governments of my Dominion."

Landslide Buries Five

Men Preparing To Stop Work When Accident Occurred

Pierreville, Que.—Five men lost their lives when buried under a landslide near here. They were employed on excavation work on the shores of the St. Francis River in Nicolet county.

The accident occurred as the men were preparing to quit work in the 25-foot-deep hole in which they were digging. The excavation was completely filled by the landslide. Bodies of the victims were recovered seven hours after the men were trapped.

Lord Ashfield On Commission

London, Eng.—Lord Ashfield, chairman of the London Underground Electric Railways, has accepted an invitation of Prime Minister R. B. Bennett of Canada, to become a member of the commission which will investigate Canadian railway and transport systems. He will leave for Canada this week.

Calgary, Alberta.—With approximately 6,000 head shipped from Alberta since the opening of the season in the spring, export of cattle to the Old Country has benefited Alberta ranchers to a great extent, according to J. F. Brown, M.P., for Calgary, in September 1,000 head were shipped, while total export from the Dominion was about 22,000 head.

Another Prominent

Alberta Woman Dead

Mrs. O. C. Edwards Of Macleod, Succumbs To Pneumonia

Lethbridge, Alberta.—Mrs. O. C. Edwards, prominent in the National Council of Women, died November 10, of pneumonia at her home in Macleod, Alberta.

Mrs. Edwards was one of the five distinguished Alberta women who carried the appeal to the Privy Council which gave women the right to sit in the Canadian Senate.

She was a past vice-president of the National Council of Women, and convener of the legislative committee of the National Council. Mrs. Edwards was a recognized authority on laws for women and children.

LEAGUE TO DEAL WITH TROUBLE IN MANCHURIA

London, Eng.—Sir John Simon, new Foreign Secretary, is going to Paris for the League of Nations meeting concerning Manchuria, and it was announced that U.S. Ambassador Charles G. Dawes will observe the proceedings for the United States.

In London the opinion is that the issue will be brought down to earth at this session and some sort of definite plan for dealing with the situation in Manchuria may be evolved.

One way out, it is suggested here, would be for the League to appoint an international investigating commission whose work in the Far East would require several months during which the belligerents might cool off and the dispute might be settled by peaceful negotiations.

Failing this, an alternative would be an attempt to force Japanese obedience to the League's dictates, but no authoritative commentator would say he thought the League was likely to adopt such a course.

Geneva, Switzerland.—Japan has resumed the offensive in the Nomon Bridge area in Manchuria, China declared in an urgent communication to the League of Nations. The message said that Japan's troops had advanced their lines and were 20 kilometres on the road to Taitshai.

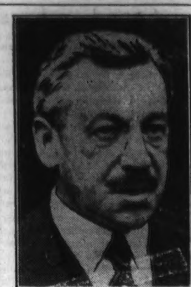

The Chinese were retreating, the communication continued, under bomb attacks and self fire from the Japanese forces.

Two more notes from Dr. Alfred Sze, Chinese member of the League of Nations Council, charged that Japanese military authorities in Manchuria were working systematically to displace local Chinese authorities with groups under Japanese control.

Named For University Post

St. Andrews, Scotland.—General Sir Rt. Hon. Jan Christian Smuts, South African statesman and scholar, and Lord Inchcape, British economist and industrialist, were selected as the candidates for the rectorship of St. Andrews University to succeed Sir Wilfred Grenfell, Labrador medical missionary, whose term of office has expired.

IN NATIONAL CABINET

Sir Herbert Samuel, Secretary of State for Home Affairs.

Planning Big Domestic Loan

Bonds Will Probably Be On Sale Very Shortly

Ottawa, Ont.—Good progress is being made in preparing plans for the domestic loan which will shortly be launched by the Dominion Government. While no official information has yet been given out, it will probably be a week before the sale of new bonds actually begins.

The rate of interest is said to have been fixed at five per cent, but further conference will be held before the final decision is reached as to just what price the bonds will be offered to the public. The general impression is that the amount of the loan asked for will be \$125,000,000. The money is to be used for meeting requirements of unemployment relief and for various other purposes.

Shocks British House

Labor Member Derides Speech From the Throne

London, Eng.—Rt. Hon. George Lansbury, Parliamentary veteran and leader of the Labor Opposition, shocked the House of Commons by waving a copy of the King's speech opening Parliament and describing it as "this incongruous document, full of nothing from beginning to end."

His gesture came in the midst of a scathing attack on the new government for what he called its vague policies and upon the Prime Minister himself, for the part he played in forming the National Government.

Canadian Wins Cup

New York, N.Y.—Canada took one challenge cup from the National Horse Show in the fourth day of the 46th "annual" at Madison Square Garden, when James Franceschini, of Toronto, won the Danum-Woodbine challenge trophy for heavy harness horses with his black gelding, "Saxon Ideal," which was perfectly driven to beat out a selected field of six entries.

More Work In Britain

London, Eng.—British unemployment on Nov. 2 totalled 2,710,944, a decrease of 15,148 in a week. It is announced. A steady decrease has been shown every week since the beginning of October.

PROMINENT IN NEW BRITISH CABINET

Here are six of the new members of the British Cabinet announced by Premier MacDonald this week. Top, left to right: Sir John Simon (Liberal), Foreign Minister; Right Hon. Walter Runciman, President of the Board of Trade (Liberal); and Sir Philip Cunliffe-Lister (Conservative), Secretary for the Colonies. Bottom, left to right: Sir Henry Betterton (Labor), Minister of Labor; Right Hon. Neville Chamberlain (Conservative), Chancellor of the Exchequer; Lord Hallam (Conservative), Secretary of State for War.

Foolish Economy

War Debts Blamed For World-Wide Depression

London, Eng.—High points touched by Prime Minister Ramsay MacDonald, speaking at the first business session of the new House of Commons.

A system of "crazy economy" in regard to war debts and reparations has brought about world-wide depression. "It is impossible to decree that without regard to circumstances certain blocks of gold shall be transferred from one nation to another without resulting in impoverishment of the nation which hands out the gold and ultimately of that which received it."

Premier Laval's visit to the United States should lead to an understanding between France and Germany. "In the full and final understanding, however, every nation involved must be a party to the agreement."

Unable To Act

Sir John Simon Now Deprived From Acting On Canadian Cases

London, Eng.—The acceptance by Sir John Simon of the foreign secretaryship in the National Government automatically deprived several important Canadian interests of his legal services, particularly in cases before the Privy Council.

It was intended he should lead for Quebec province in the radio control appeal, the hearing of which is estimated to take place early in December, but it is now presumed some Canadian counsel will appear in his stead.

LITTLE REAL PROGRESS MADE TO END WAR

Montreal, Que.—Armistice Day, 1931, 13 years after the war "which was to end war," found little real progress toward the goal of peace, General Sir Arthur Currie, Commander-in-Chief of the Canadian corps in France, declared in a speech on disarmament here.

Hope that had sustained the combatants during the dark days of the war, that the suffering would ensure that their children and their children's children would never have to undergo a similar horrible experience, had been shattered. "The prospects of peace are no more assured today than they were in 1918," he stated.

"I am sure you will join me," Sir Arthur stated, "in saying that the next disarmament conference is a success, that it succeeds in bringing about an honest and universal reduction in the killing and wounding power of arms. It will do no good, in fact, it would have the opposite effect, if one nation disarms honestly and others do not. Disarmament must be honest, must be mutual, must be universal."

"Thirteen years have gone by and how great has been our disillusionment. It is true we have tried to do something which we hoped would prevent war. For ten years we have had the League of Nations, whose definite purpose is the promotion of peace and the settlement of international controversy by peaceful means."

"We have our Locarno and Washington pacts, we have the Kellogg-Briand treaty which registers the determination of more than 60 countries including the United States and Russia, to condemn recourse to war for solution of controversies and national policy," he went on.

"The history of the past has taught us, and the history of the present confirms most emphatically, that these solemn engagements are easily disregarded. Witness what is now happening in Manchuria between China and Japan. Whatever the irritation by China, and I have no doubt it has been great, Japan has broken word and professed her pledge for her war-like actions in the last month. With inexcusable effrontery she has defied the League of Nations, which seems to be as powerless as it has been weak."

Sir Arthur felt a great mistake had been made by the League in inviting a representative of the United States of America to join the Council Board. That political move seemed to have loomed large in the eyes of the League than the struggle itself—"or did they know that the League would fail and wish to have the United States of America associated with the failure?"

Memorial For Edison

West Orange, N.J.—Mrs. Thomas A. Edison, widow of the inventor, Wednesday, November 11, approved a plan for a \$10,000,000 world memorial to her late husband.

ALBERTA LEADS AS THE GREATEST GRAIN PRODUCER

Ottawa, Ont.—Alberta replaced Saskatchewan as the greatest wheat producing province of the Dominion this year, with a total estimated yield of 135,000,000 bushels, the report of the bureau of statistics showed Thursday, November 12.

In 1930, the Alberta wheat yield was 132,900,000. Saskatchewan this year has an estimated yield of 117,000,000 bushels, compared with 194,322,000 of a year ago. Manitoba shows a drop from 45,278,000 bushels to an even 27,000,000 this year.

Drouth took its toll in both Saskatchewan and Manitoba during the crop season. The estimate per acre for Alberta this year is 16.9 bushels as against Saskatchewan 7.9, and Manitoba 10.5.

"The 1931 acreage sown to wheat, taken for the first time from census returns, in the prairie provinces is given at 20,352,722 acres; oats, 8,311,967; barley, 3,202,727; rye, 711,709; and flaxseed, 618,561. The acreage last year was: Wheat, 22,660,000; oats, 8,286,000; barley, 4,755,000; rye, 1,370,000; and flaxseed, 571,000.

Canada's wheat acreage for 1931, in all the provinces, based on the summer census returns, shows a total of 26,115,726 acres, down to this major grain as compared with 24,897,900 acres in 1930, the Dominion Bureau of Statistics crops report issued recently stated.

The estimated yield per acre is placed at 11.4 bushels as compared with 16.0 in the season of 1930.

Menace Of Armaments

The Very Root Of War, Says Sir Robert Borden

Ottawa, Ont.—The menace of armaments is the very root of war, and war by mankind has been martyred, said Sir Robert Borden, Canada's wartime Prime Minister in a Remembrance Day message here. More than ever the menace of armaments oppressed the world today he asserted.

"Can we estimate humanity's irreparable loss in the sacrifice of the generation that went forth to conflict nearly two decades ago?" he questioned. "In how great measure are present day burdens, destitution and distress due to the destruction and wastage of that conflict and of past wars?"

Sir Robert dealt with disarmament. He stated that the nations signatory to the League of Nations covenant gave therein their pledge that national armaments should be reduced to the lowest point consistent with international safety and the fulfillment of international obligations for common action.

"The actual work of the league began ten years ago," he said, "during at least seven years the ablest and most earnest minds have devoted their full energies and their most intensive effort to the fulfillment of this pledge. Substantial progress has been made, and, if world conditions permit, a disarmament conference of the world's nations will meet in February. It will be confronted with the almost insuperable task of committing each nation to substantial reduction of its armaments."

"It is true we have tried to do something which we hoped would prevent war. For ten years we have had the League of Nations, whose definite purpose is the promotion of peace and the settlement of international controversy by peaceful means."

"We have our Locarno and Washington pacts, we have the Kellogg-Briand treaty which registers the determination of more than 60 countries including the United States and Russia, to condemn recourse to war for solution of controversies and national policy," he went on.

"The history of the past has taught us, and the history of the present confirms most emphatically, that these solemn engagements are easily disregarded. Witness what is now happening in Manchuria between China and Japan. Whatever the irritation by China, and I have no doubt it has been great, Japan has broken word and professed her pledge for her war-like actions in the last month. With inexcusable effrontery she has defied the League of Nations, which seems to be as powerless as it has been weak."

Sir Arthur felt a great mistake had been made by the League in inviting a representative of the United States of America to join the Council Board. That political move seemed to have loomed large in the eyes of the League than the struggle itself—"or did they know that the League would fail and wish to have the United States of America associated with the failure?"

Reports are that cotton sales have jumped 10 per cent. At least 20 per cent, some of which have been closed four years, are running again.

Lloyd George Taking Trip

London, Eng.—Rt. Hon. David George has recovered from his recent illness sufficiently to take a sea voyage and sailed for Colombo, Ceylon, with his wife and daughter, Megan. A doctor and nurse accompanied them.

An electric power company in Argentina is selling radio sets on time, the instalments being added to the customer's monthly bills for electric current.

Canada's Great Buffalo Herds

Department of the Interior To Reduce Herd In Buffalo National Park

So successful has been Canada's effort in bringing back the buffalo that it has again become necessary to dispose of the animals surplus to the grazing capacity of the great forest reserve near Watnwright, Alberta—Buffalo National Park. Arrangements are being made by the Department of the Interior to reduce the herd by the slaughtering of 1,500 head this fall. About ten years ago it was felt that the range at Buffalo National Park was not capable of sustaining the large numbers of buffalo which were grazing thereon. A report was made at that time by officials of the Dominion Department of Agriculture which recommended that the herd should not be permitted to exceed 5,000 head, as under normal conditions the area reserved was not capable of sustaining a greater number.

It was found necessary to slaughter almost 2,000 in the fall of 1923, and since that time nearly 4,000 more have been disposed of. Although the slaughtering of this large number was helping to keep down the size of the herd it was not sufficient to reduce it to the proper extent. Since that time nearly 7,000 additional have been transported north to join a herd of approximately 2,000 wood buffalo which had its habitat on an immense natural range known as Wood Buffalo Park, located near Fort Smith, N.W.T.

The buffalo robes and coats of today are much superior articles to those known when the buffalo roamed the prairies in countless numbers. The buffalo robe of the old days was usually a black velvet due to the fact that the great majority of animals were shot by the Indians in the summer when the robe is at its lightest in colour and poorest in quality of fur. The animals from the Buffalo National Park herd, however, are disposed of in the late fall when the robe has attained its winter thickness as well as the fine dark colour which distinguishes it during the cold season. Modern methods of dressing also make it possible to prepare the skin so that it is flexible and light in weight.

In addition to the fur, the slaughter of the buffalo provides a quantity of choice game meat. The flesh of a young well-nourished animal is considered many to be better flavoured than the best beef, and this has apparently been substantiated by the ease with which the meat of the buffalo slaughtered in previous years was disposed of.

Buffalo National Park is a very interesting objective for tourists and has been visited by over 20,000 in one year. The sight of this great herd scattered over the rolling prairies or moving about in great numbers is indeed a thrilling one. The buffalo are in excellent condition as the area in which the park is situated is part of their natural habitat and it received an adequate amount of moisture during the last two years.

Signs Of Better Times

Outlook For Sale Of Canadian Wheat Is Improving

Signs of better times are apparent in Europe and the outlook for the sale of Canadian wheat has improved. In the opinion of A. L. Searle, president of the Searle Grain Company, one of the largest grain elevator concerns in western Canada.

Back from an extensive trip through Great Britain, Germany and France, Mr. Searle said, in an interview at Winnipeg, that he was convinced the new British National Government would introduce some form of tariff, though he thought any preference for Canadian wheat would be conditional on a preference for British goods coming to Canada.

France, crops depleted by unfavorable weather, will require between 40,000,000 and 60,000,000 bushels of wheat from outside the country this season, he believes.

"Isn't my son like me?"
"Yes, but don't worry, he may grow out of it."—Lustige Kölner Zeitung, Cologne.

W. N. U. 1916

May Revise History

Evidence Proves Why Sir Henry Clinton Failed Lord Cornwallis

A newly revealed incident of the Revolution and one that is certain to cause a revision of many histories of the period has come out of the Yorktown Sesquicentennial celebration. Briefly the tale is, that a strange physical disability, rather than lack of military skill on the part of Sir Henry Clinton, Commander-in-Chief of the British forces in America at the time, was perhaps the deciding factor in the victory of the Continentals at Yorktown over Lord Cornwallis.

At the time Clinton was supposed to be pushing from New York to rescue the beleaguered Cornwallis, he was temporarily blind and too proud to admit it. Had it been otherwise, Cornwallis might have been saved the ignominy of surrender. Washington himself feared the arrival of Clinton. That is why he refused to prolong the surrender proceedings.

The story of Clinton's affliction was brought to Richmond, Virginia, by Dr. Randolph G. Adams, head of the famous Clement's Library at the University of Michigan.

According to Dr. Adams, who has access to Revolutionary papers never before examined by historians, Clinton, a morbid and extremely introspective man, was subject to temporary blind spells in periods of great stress when he was called on to make vital decisions. Evidence of this is in the documents which have been acquired by the Clement's Library since 1926.

An episode dealing with Clinton's affliction written by Dr. Adams was included in the pageant at Yorktown, but its significance was overlooked, it is believed, because there was no libretto of the pageant to explain the background of the episode.

Historians generally have supposed that Clinton was either a "dud" as a military leader or else that he was convinced Washington intended to attack him in New York. The American commander had written dispatches to this effect and had been careful to see that they had been intercepted by the British.

Where Students Spend Their Leisure Time

Columbia University Found Moving Pictures Were Greatest Attraction

The undergraduate student publication of Columbia University, the Spectator, recently questioned 308 typical students of that institution as to where they prefer to spend their leisure time. The information was desired because the many attractions in New York City tend to distract the attention of the students. The replies indicated that almost one-half of the students interviewed had never visited the American Museum of Natural History. In Central Park, probably the greatest scientific museum in America. On the other hand, all except 20 of the 308 had been to one or more of the big Broadway motion picture theatres.

Michigan, the home of the automobile, has about 800 blacksmith shops and 70 livery stables.

In case of an auto wreck, should the man precede the lady through the windshield.

Some folks seem to think prosperity is never coming back, but then some never expected to see women wearing long skirts again either.

When the R.M.S. Niagara of the Canadian Australian Line, docked at Vancouver from Australia and New Zealand ports, included among the 1,500 tons of cargo was a valuable shipment of 11 Carriacou sheep from Christchurch, N.Z., destined for the Canadian Governmental Station at Lethbridge, Alberta.

Markets For Canadian Furs

Total Of \$11,187,389 Worth Of Raw Furs Exported Last Year

Great changes have come over the fur trade in Canada in recent years. The railway has revolutionized conditions wherever its influence reaches. Vessels now ply the larger lakes and rivers. Competition has increased and new territory is eagerly sought as in the days prior to 1921. Increase in trapping and improved methods of capture, together with the advance of lumbering, mining and agricultural settlement, have driven fur-bearing animals farther and farther afield, and to conserve the fur resources of the country the provinces have found it necessary to enact laws to regulate the capture of fur-bearing animals and to provide for close season during certain periods of each year. The fur trade has assisted in meeting the demand for furs by popularizing Canada, the value of pelts of ranch-bred animals now representing about 12 per cent. of the total annual value of the raw fur production of the Dominion. The fox has proved the most suited for domestication, although other kinds of fur-bearers are being successfully raised in captivity—mink, raccoon, skunk, marten, fisher, muskrat and beaver.

The important markets for Canadian furs are London and New York; the trade tables for the twelve months ended June 30, 1930, show that of the total of \$11,187,389 worth of raw furs exported, the British Isles received \$9,453,322 and the United States \$6,972,456. At the close of the Great War, Montreal took a position as an international fur market, holding the first Canadian fur auction sale in 1920, when 949,565 pelts, valued at \$5,057,114 were sold. The most recent figures show that at the auction sales held in Montreal during 1930 there were 2,328,977 pelts disposed of, with a total value of \$5,587,400. Sales are also held at Winnipeg and Edmonton. An important industry in Canada in connection with the fur trade is that of the dressing and dyeing of furs.

Miles Of Wire On Line

So great a part does electricity play in a modern ship that the "Empress of Britain," and similar big liners have hundreds of miles of wire connecting up the telephones, light, signalling and power devices. Heavy cables installed in the "Empress of Britain" reach a length of 175 miles. But there are over 200 miles of electric wire in the vessel.

Sheep From Australia

When the R.M.S. Niagara of the Canadian Australian Line, docked at Vancouver from Australia and New Zealand ports, included among the 1,500 tons of cargo was a valuable shipment of 11 Carriacou sheep from Christchurch, N.Z., destined for the Canadian Governmental Station at Lethbridge, Alberta.

Newspaper Has Large Place In Education

Opinion Of Eastern Writer

The place which newspapers might take in the education of children is suggested by a writer in the Midland Free Press. He believes that every school teacher who has charge of children more than ten years old should devote a part of the school day to reading newspapers to them and commenting without bias on the information they contain. There is no doubt that what is going on today will arouse more interest in a child than what went on in Greece and Rome centuries ago. No child should be allowed to grow up ignorant of the doings of the contemporary world. The writer says:

Today the well-edited newspaper is really a modern college. I know of no constant newspaper reader who is not well informed and intelligent. And I believe that by interesting children in the world and its ways early in their lives the school will help them to achieve a breadth of view and a habit of forming intelligent opinions that they would probably gain in no other way. Incidentally it will give them more alertness and keenness to learn and make the task of the teachers in imparting other useful knowledge to them far more easy.

The experience of business and professional men is that a large proportion of young people who may be accurate in arithmetic or skillful with the typewriter are lamentably ignorant of current events. To that extent their usefulness to their employers is lessened. The comments of the Free Press writer remind us of a former successful Canadian Minister of Finance who was not known as a scholar or as a wide reader in the ordinary sense of the term. But for years he had carefully gone through newspapers from all parts of Canada, thus acquiring an extensive and accurate knowledge of even the most distant districts. Indeed, it was said that he was often better informed on local conditions than members who represented particular districts.—Toronto Mail and Empire.

Wasted His Money

New York Man Lost Out On Costly 'Phone Call

The New Yorker, clever metropolitan weekly tells of one of its townsmen who had a friend an officer on the S.S. Leviathan. Reading a news item that the ship was due in port he took up his telephone receiver and asked for the Leviathan, which always ties up to the city system when at her berth.

He was connected with the ship and asked for his friend. The officer came to the line and received an invitation out to dinner that night. The city man was annoyed when his friend scoffed at the invitation. "What's the matter?" he asked.

"We're still three hundred miles out at sea," came the amused reply.

The call cost twenty-one dollars.

You've got to be careful how you handle these new inventions. Even a safety pin left unfastened, can give you a nasty jab.

Looks as though France and Germany have buried the hatchet. But the question remains—Have they forgotten where they buried it?

Picture Were Greatest Attraction

Crusoe's Island Inhabited

Centenarians Shows 288 People Are Living On Juan Fernandez

The isolated island of Juan Fernandez upon which the original "Robinson Crusoe" lived in solitude for many years, is now the home of a considerable number of inhabitants. The domain over which the original "Robinson Crusoe" wandered with his man Friday, has had its first census taken. Instead of the one white man carrying an umbrella made of goat-skin and herds of wild goats, which were once the sole inhabitants of this volcanic isle, Juan Fernandez has now 288 inhabitants, according to the report of the Chilean Government, who have made the island one of the most fertile and most fruitful spots in the world.

The island is a little more than 12 miles long and almost four miles wide situated about 350 miles west of Valparaiso. Despite its proximity to the mainland, however, Juan Fernandez differs remarkably in its flora and fauna from nearby Chile. The flora is particularly notable for a very large number of different species. A recent visit to the island by biologists has convinced many scientists that the geologic history of the isle is as remarkable as its romantic background. Juan Fernandez, discovered in 1571, by the adventurer whose name it bears, was the lonely home of Alexander Selkirk, a Scottish buccaner, who lived on the island in solitude for the four years from 1704 to 1709. The story of Selkirk's unique adventure inspired Daniel Defoe to write "Robinson Crusoe" the childhood friend of multitudes.

Considers It An Outrage

Viscount Lee Condemns Practice Of Transporting Ancient Buildings

Viscount Lee of Farnham, in a speech in London, England, condemned the practice of "a few wealthy vandals in buying up and transporting bodily ancient buildings from the British Isles for erection in Argentina or other inhospitable and unbecoming spot across the Atlantic."

Lord Lee, who presented Chequers, the famous old English manor, to the British Government, outlined the work of the Society for the Protection of Ancient Buildings in Great Britain. Referring to the actions of foreigners removing buildings, particularly to United States, he said: "This method of architectural reproduction is one of the outrages which the society would like to see added to the criminal calendar."

He also spoke of "those vandalistic vandals which have defaced and defiled so many of our churches and cathedrals."

Less Storage Eggs

Sharp Reduction Is Shown In Government Report

A sharp reduction in storage holdings of eggs is shown in the weekly report issued by the Dominion Department of Agriculture. On November 1 stock of stored eggs in Ontario totalled 101,435 cases, compared with 131,664 a year ago; Montreal, 33,194 cases, against 104,046 last year; and Winnipeg, 33,847 cases on hand, compared with 46,735 on November 1, 1929.

The storage egg market has maintained a firm level during the week, but the movement of the fresh egg market has been somewhat variable. In British Columbia there is increased production of fresh eggs, and with a strong demand from outside the province, prices are on a firm basis.

All-Weather Highways

Several of the passes, through which it took the early explorers weeks to traverse the Rocky Mountains, are now the locations of splendid all-weather highways built by the National Parks Branch of the Department of the Interior. These mountain areas are just as grand and impressive as when first seen by Sir James Hector, David Thompson, and other great explorers who travelled these passes during the early part of last century.

Reaches More People

Rev. Dr. Gibson deplores the fact that half the churches of Toronto are not more than quarter filled on Sundays. This may be evidence that people are less interested than they were in the things of the spirit. But if one takes into consideration the broadcasting of sermons the conclusion may be reached that more people than ever are listening to the Sunday services.

Apples can be peeled easily if they are first steeped in boiling water for a minute. Tomatoes should be placed in a colander and boiling water poured over them before they are peeled.

A children's museum has been opened in Kyoto, Japan.

Life In The Far North

Radio Programmes Now Intrigue Modern Eskimo Ladies

Radio programmes intrigue modern Eskimo ladies. Jazz, classical, even the dramatic—they like it all, but the madame who broadcasts the latest fashion dictates of Paris, broadcasts in vain no far as these ladies of the Arctic are concerned. Majane of the air may tell in dulcet tones of airy, filmy underthings, she may dictate as to the exact orientation of the latest waistline—Eskimo ladies just yawn and tell us that to turn on a station with a bit of pep.

Such information is vouchered for by Col. J. K. "Jim" Cornwall, veteran trader, prospector and colonizer who straddled to Vancouver recently after many months above the Arctic circle. Col. "Jim" now makes his home in Victoria.

There are changes, Col. "Jim" admits, in the north. But they have not affected the garb of the Eskimo ladies. Eskimo brides are still picked with a view to breadth, and teeth which are fit to chew their spouses' moccasins into a pliable state of use. They still wear their furs in the same old way with the fur turned in.

But if the Eskimo women have not changed their way of dressing, other things have changed in that north country which is now looked to as a potential bonanza of copper, silver and radium ore. The cheelako, tenderfoot, newcomer—call him what you will has changed. Kindly persons that distant north call these "student trappers."

"They say the radio is a great boon to the trapper—gives him the latest fur prices and all that," says Col. Cornwall. "Well, I guess it is, but the trouble with some of these 'student trappers' is that they spend so much time listening for the broadcast of fur prices that they forget to trap any fur."

In the matter of social amenities, the radio is a serious threat to the prestige of the old-time northern fiddler and accordion artist. In the old days these boys were endorsed as artists of social activity and social activity meant the dance.

Up there they call a dance a "moochigan." Formerly you could have a "moochigan" with a floor, a roof and no windows—if the fiddler was agreeable. Now you have to have a radio or a gramophone.

This summer Col. Cornwall chartered a boat and prospected into parts which were hitherto unknown to him. He looked at radium ore, developments, and copper exploration on a grand scale.

In the northern parts he observed the stirring of a departure. Mineral men in the north are convinced they can find gold and they are making preparations to go after it. Next year may see the start of a persistent, scientific search for the "standard metal" in a country which has already promised much in baser ores.

Works Like An Elevator

Falling in love according to Sir J. Arthur Thomson, is really rising in love. This center in life has more possibilities of uplift than any other.

Love however, is much like an elevator. It may take you to the seventh heaven of happiness or to the very depth of despondency.

It comes and goes and never seems to work on schedule. Frequently it defies all expectancy.

And once you're in it, you may be stuck plenty.

Glider Soars To Great Height

Soaring through a snowstorm and blustering wind, two men in a frail motorless glider were boosted nearly a half mile above Elms, New York, to set unofficial altitude and soaring time records for their type of craft. The utility type glider climbed 2,400 feet and remained in the air two hours and 13 minutes.

An essence used in the manufacture of artificial pearls is obtained from herring scales.

Doctor: "You are much better. How you feel for a herring?"
—Client: "No, but my wife and mother-in-law have."—Il Travaso, Roma.

Chautauqua Deserves Support

On next Saturday and the following Monday, Tuesday and Wednesday, Crossfield will again be visited by Chautauqua entertainers and lecturers. The Chautauqua season has become an important item in our year's entertainment and one that is prized highly by those in the past seasons have availed themselves these outstanding opportunities for enjoyment of fine musical and dramatic art, and for the stimulation of their minds and hearts by listening to addresses replete with logic, lofty sentiment and inspiration.

Chautauqua brings to a community something that is uniquely helpful. It acts on the communal system like a tonic, reviving enthusiasm and spreading abroad the gospel of optimism and good cheer.

We might also point out that Chautauqua while one of the best entertainments procurable is also from a financial standpoint one of the cheapest. It is the only entertainment that many people in the district are able to see from year to year. It is only got here through a number of citizens guaranteeing a certain amount of tickets sold and if Chautauqua is not supported it will cease to come here as those citizens cannot be expected to keep on paying a deficit year after year.

Dog Pound Notes

BORN—To Mr. and Mrs. E. Hepper on Thursday, Nov. 12, a daughter.

J. Harrison shipped a number of hogs from Dog Pound on Tuesday.

Mr. and Mrs. Wm. Gray are spending a few days in Calgary.

Mr. Fay Stone returned home from hunting on Friday, bringing a moose hunt with him.

MATRIMONIAL

A large number of neighbors and friends assembled at the home of Mr. G. W. McIntosh on Wednesday afternoon of this week the occasion being the marriage of their daughter Christina to Mr. Wm. Rowney.

After the ceremony which was performed by Rev. H. Young, a splendid buffet luncheon was served. Amid a shower of rice the young couple left on a honeymoon trip to Calgary.

A quiet wedding took place on Tuesday afternoon at the home of Mrs. J. B. McNicol, when in the presence of immediate friends her son Mr. Frank McNicol was united in marriage to Miss Postlethwaite of Bottrell, Rev. H. Young performed the ceremony.

Sunday before Advent.
Evening - 7.30 p. m.
Sunday, November 23rd.
Advent Sunday, Missionary Service
Choir will sing the Anthem "What are These"

Notes of Tuxis Boys Group

The group re-organized on Tues. November 10th. The following officers were elected: Rev. H. Young, Leader; President, Gordon Johnson; President, Ronald MacFadyen; Vice-Pres., Herbert Seville; Rowland Fleming, Treas. The group is to learn "The Life of Christ," conducted by Mr. Young.

Owing to the efforts of George Nasadyk, a short, but very enjoyable entertainment was given at the meeting held at the United Church, Monday, Nov. 16.

Herbert R. Seville, Sec.

H. E. G. H. Scholefield of Crossfield, has taken up residence here, having recently been appointed resident relief, agent of the provincial government, having charge of the territory east as far as the border.—Hanna Herald

THURSDAY, NOV 19th, 1931

Local and General

Miss Margaret Murdoch was a Calgary visitor on Saturday.

W. K. Gibson shipped a carload of hogs to Calgary on Tuesday.

Mr. F. Collicutt left on Sunday for Toronto where he will attend the Royal Winter Fair.

Mrs. A. A. Halliday and Mrs. R. T. Amery were visitors in Calgary on Saturday.

Remember the bazaar and tea in the U. F. A. hall on Saturday, Nov. 21.

Joe Gilchrist wrenched his back while unloading a barrel of oil the other day and has been performing duties under difficulties ever since.

After a week of cold weather and a light fall of snow, a chinook set in on Wednesday and mild weather is again prevailing.

Remember the Dance in East Community hall on Friday night of this week. Get your share of the hocus pocus money.

Get your court whist cards, bridge tally cards, score pads and playing cards at the Chronicle office.

Kenneth Gilchrist returned home on Wednesday from Maple Creek where he has been visiting relatives for the past week.

Olaf Kolstad and J. Ferguson of Airdrie, who have been away big game hunting, returned on Friday last with two big moose.

We have a wonderful assortment of Christmas greeting cards at the Chronicle office and prices are lower than ever.

Mrs. A. W. Gordon returned on Monday from Calgary where she has been visiting relatives for the past week.

Crossfield Tennis Club propose having a dance on New Year's Eve, Thursday, Dec. 31. Music by a Calgary orchestra.

Fred Gough and Melvin Carrio of Carstairs took second place in the Boys Provincial Stock Judging Competition held at Edmonton recently. Eight teams competed.

Mrs. A. Cruickshank, Mrs. F. Landers, Mrs. Wm. Pogue and Mrs. W. H. Miller were in Carstairs on Friday evening last at the Women's Institute bridge held at the home of Mrs. Downie.

Billy Murdoch, Harry Fenwick, Ed. Gilson, C. Donald and Joe Gallelli returned on Monday from the west country where they have been hunting big game for the past two weeks. Three moose fell to the guns of the party.

The old domestic battle is on again. The good wife is mad at hubby. The screen doors are still on and the storm doors are in the shed. Why not end it all now and get a combination storm and screen door from the Atlas Lumber Co.

Miss Edith Seville entertained at four tables of bridge at her home on Tuesday evening. Miss Frances McFadyen and Mr. R. Thomas winning first prizes, and Miss Jean Collicutt and Mr. E. Greene the consolation prizes. A dainty lunch was served by the hostess.

The Ladies Aid of the United Church are making an appeal for discarded clothing and bedding which they plan to distribute to needy families in the district. We understand that Constable Jarman has volunteered to distribute and oversee the giving out of clothing, etc. to families who are actually in need of it. Further particulars may be had by phoning Mrs. Methers or other members of the Aid.

STOP! LOOK! LISTEN!

Annual Bazaar, Sat. Nov. 21

The Women's Guild of the Church of Ascension are holding a bazaar, afternoon tea and sale of home cooking on Saturday 21 of Nov.

They have a wonderful lot of fancy work suitable for Xmas gifts and would be worth your while to come and see the things before purchasing elsewhere. Music will be furnished.

Oddfellows from Crossfield and Airdrie Visit Calgary

Last Thursday night Lodge No. 421, O. O. F. attended Crescent Lodge No. 81, Calgary, where the third degree was conferred on Bros. McTeer of Crossfield and Duke Deary of Airdrie Lodge No. 34. The work was put on in a fashion that was very becoming to this impressive degree and a credit to the team and its captain Bro. Webb.

About 200 attended from the different Lodges, Sandstone City, Hillhurst, Airdrie and Crossfield. The following visited at the Rectory lately, Mrs. Riddell and daughter Grace; Mr. and Mrs. N. Fiske from Red Deer; Rev. Young of Crossfield.

United Church Services

"What do you believe about the Divinity of Christ?" "What does the United Church teach about it?" "What does the bible teach about it?" This will be the subject at the United Church next Sunday evening. The choir will sing "No Not Despairingly Come I to Thee."

Shower at Sunshine

A very enjoyable evening was spent at the Sunshine school on Friday, Nov. 13th. when Miss Christie Mackintosh, bride-to-be was showered with many beautiful and useful gifts. W. Rowney who is to be the lucky man, was also showered with hankchiefs. The evening was spent in games and dancing. A dainty lunch was served. Miss M. Lennon and Miss Jean Mackintosh were the hostesses.

Fellowship Club Notes

The regular meeting of the Fellowship Club was held in the Masonic basement hall on Thursday night. As the meeting was of a devotional character the singing of hymns took the place of the usual community singing.

During the business meeting several committees were appointed and the treasurer, E. C. Collier gave his report. Following the business meeting Mr. Currie entertained the Club with a most interesting and amusing account of his first impressions of Canada. Club members are looking forward to hear more from Mr. Currie during the coming season.

On Thursday evening the following new members were enrolled: Mr. and Mrs. W. K. Gibson, Mr. R. Thomas, Harry Pierce, Evan Gordon. Many new applications were submitted also.

The meeting on the 26th of Nov will be of an intellectual character.

Club Notes

"Father, a married man and powder on your shoulder!"

"Rescue the perishing!" — Mr. Collier in charge.

"Don't they make a handsome couple."

"I do wish he danced."

Mrs. Miller: "Mr. Collier do you think we could commercialize our dancing?"

"They said he has no adonis—but we sometimes wonder."

Not So Good on the Dishcloth

A mother made the following remark while watching her daughter dance on Armistice night:

"I wished my daughter would wrap herself around the dishcloth as well as she does that fellow she is dancing with."

Aint it the truth. How they do wrap themselves in these new fangled dances is a scream, yet they call it dancing.
